EVERLANE

SHOE CARNIVAL

“Every user experience is different: there's nothing specific to luxury, just good sense. In our opinion, that's the answer to good UX – the user experience must be simple and straightforward. And we transcribe this into the design of our website.”

- Pascal Sardella, Digital Platforms Administrator, TAG Heuer

Search that delivers

Understanding user intent for better CX

Algolia's Neural Search combines the precision of keyword search with the understanding of AI-powered semantic search, helping Ralph Lauren's customers find exactly what they need, even when they don't use the exact terminology in your catalog.

[Explore Neural Search](#)

Unmatched, lightning-fast search speed

We built our solution from the ground up, meaning no extra baggage, and no compromises. “Search as you type” means for every keypress, our tools scan, analyze, and serve real-time inventory data — and it all happens in less than 50 milliseconds.

[Learn more](#)

Easy integration into any tech stack

Our merchandising capabilities are able to integrate with all leading tech stacks, including Salesforce Commerce Cloud, with a faster time to market and higher ROI, thanks to our API clients, composable architecture, and best-in-breed partner integrations.

Connect inspiration directly to purchase

Make Ralph Lauren's unique visuals and brand storytelling a core part of product discovery by integrating editorial and product experiences, making it easier for customers to explore and engage.

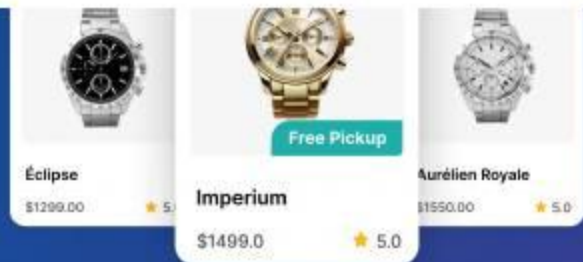

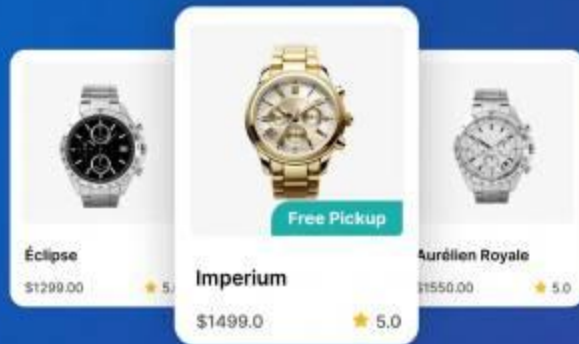

Gain more control and flexibility over

Flexibility over merchandising

Improve efficiency by \$1.6M and see 35% time savings* by reducing manual lifts for merchandising and search teams, curating customers' search results with intuitive AI tools that are always learning.

**Based on a composite business model*

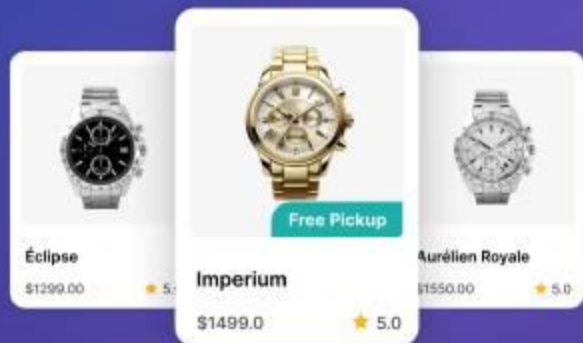

Drive more revenue with personalized experiences for every customer

Increase average order value (AOV) 15% on average when you increase customer interaction with advanced AI image search, semantic search, and personalization, leading to better customer experience and better returns.

Prepare for AI-driven discovery and commerce

Reduce time to checkout by 50% by connecting customer data with AI agents to deliver online shopping experiences that are as personalized and tailored as they are in-store.

Real-time inventory where and when it matters

Ensure your customers always see what's available to them, both online and in-store, with real-time inventory updates, store-level availability, and support for omnichannel purchasing journeys, like buy online, pickup in-store.

Built for continuous optimization, detailed analysis, and measurable impact

Algolia is built to help Ralph Lauren test, analyze, and optimize product discovery in order to keep up with constantly evolving customer preferences
